

MUL-T-LOCK NIGERIA LIMITED

The Home Of Fabrication And Innovation

MUL-T-LOCK NIGERIA

Mul-T-Lock Nigeria Limited was incorporated in 2003 as a private limited liability company. It was established to manufacture high quality doors and fabricate steel components. The company took up the challenge of manufacturing high quality products in Nigeria that hitherto were imported.

In order to produce doors, steel furniture and machinery parts of the highest international standards, the company invested heavily in modern equipment, latest cutting edge technology and manpower

development. This explains why the products of Mul-T-Lock Nigeria Limited compete favourably with similar products in the international market or those imported into Nigeria.

Since the inception of the company, Mul-T-Lock Nigeria Limited has remained focused in delivering quality products of high value and staffed with a creative and highly trained workforce.

Innovation and Fabrication

Mul-T-lock Nigeria uses steel and other kinds of metal to manufacture or fabricate by-products that are luxurious yet innovative security solutions for homes and offices. We fabricate all ranges of steel products such as laser cut solutions, facade, gates, stair railings, shelves and cabinets, diesel tanks etc.

The Process

We convert any type of metal from the raw material stage to the finished product stage. We cut (laser and plasma), weld, bend, punch holes, and paint (spray painting and powder coating) according to specifications. You order and we deliver exactly as requested.

Bending

Every angle is possible.

Shearing

Metals as thick as 16mm.

Welding

All metals except brass, aluminum, and copper.

Painting

Oven powder coating and spray painting.

Laser / Plasma Cutting

Diameter from 1mm, metal thickness up to 20mm, custom or ready-made designs.

Punching

From 0.6mm - 1.1mm thickness for Steel and up to 1.5mm thickness for Galvanized steel.

Products

Mul-T-Lock's world-renowned and award-winning locking and access control solutions are as diverse as the needs they address. From High Security, simple yet strong locksets for the residential market through to our sophisticated electromechanical access control solutions,

Mul-T-Lock's wide-range of products and solutions provide the protection our customers seek.

ENTR Smart Lock

ENTR is the intelligent locking solution you've been waiting for.

Key Free. Be Free

ENTR offer a key-free solution transforming your front door into a smart door. Eliminating the need for keys and giving you access from your smartphone or tablet, fingerprint reader, touchpad or remote control. With the protection of a mechanical cylinder and the convenience of advanced technology, ENTR provides you with security and options without compromising on performance.

Smartphonee App

With the ENTR app you can unlock your door from any Bluetooth-enabled device with encrypted Bluetooth smart technology that isn't dependent on network reception.

Fingerprint Wall Reader

The ENTR fingerprint wall reader allows you to create authorised and codes for up to 20 users and to merge user authorisation.

Touchpad Wall Reader

With the ENTR touchpad wall reader, you can easily program up to 20 different codes to unlock your door securely. Each user can select a sequence that is easy to remember and can easily be revoked.

Remote Control

The ENTR remote control unlocks your door from a distance. No need to get off the couch just click the button! This feature is particularly useful for people with limited mobility.

CODE-IT

Features:

- Enhanced access control - Up to 9 separate access codes for different users
- Flexible locking options - Doors can be locked automatically, by simply closing the door, or manually, by pushing a button
- One-way locking - Doors lock only from outside; doors open freely from within the room
- Power supply indicators - Indicator lights for activation, deactivation and battery life.

Padlocks

High Security Padlock that Protect your assets

Leading the Mul-T-Lock padlock category is our NE series padlocks. Ideal for both commercial and residential applications. Cost-effective, yet highly secure, these padlocks meet EN 12320 standards.

Secure. Efficient. Reliable

A range of padlocks capable of functioning with high reliability in all conditions, providing excellent resistance against physical attacks and maximum resistance against weather and other environmental conditions and impacts, such as corrosion. The NE's dust shutter is the padlock's secret weapon.

Applicable for Interactive+, MT5+, MT5 and Integrator
CEN Grade is model specific (see technical data guide) Illustration represents NE14H.

NE14H, Grade 6, 14mm

NE12H, Grade 5, 12mm

NE10H, Grade 4, 10mm

NE12L, Grade 5, 12mm

NE8G, Grade 3, 8mm
